ROMANCE, RACING AND RETURNING HOME Never Underestimate A Scorned Woman...Holding A Wrench!

Award-winning author Carrie Weaver joins the Harlequin NASCAR Series to thrill readers with *No Time To Lose*, the story of mechanical engineer, Jamie Tanner. Though Jamie appears more lingerie model than grease monkey, she can hold her own in the testosterone-driven world of NASCAR. And she's not about to let some struggling, chauvinistic driver say her work isn't up to speed.

But Ryan Pearce can't afford to make nice. He's counting on Jamie to find out why his performance engine keeps failing...and there's no time to lose. Ryan is only a race away from tanking his career.

Jamie has never been bested by an engine – or a man. But while spending long nights working closely with Ryan, she wonders if she's met her match....

Noted Amazon.com reviewer Harriet Klausner awards *No Time To Lose* ten stars, saying, "...the romance between the driver and the mechanic is a fine race around the track."

Author Carrie Weaver is part of a growing cross section of NASCAR fans. More than 30 million, or 40%, of NASCAR's 75 million fans are women.

Weaver credits her ex-husband for introducing her to the sport of racing twenty plus years ago. Though their marriage ended, she found her interest in NASCAR remained. "Like lots of folks who have been through a divorce, I had lonely times so hollow it made my heart ache. I'd turn on the TV to fill the silence. And, surprisingly, I found tuning into NASCAR reassuring. Surprising because NASCAR had been my ex-husband's passion and I'd simply been along for the ride. Or so I'd thought."

When Weaver's editor at Harlequin approached her about the new Harlequin NASCAR Series, she jumped at the chance to participate. Her second novel in the series, *His Father's Son*, follows in November.
